

Arizon Structures

11880 Dorsett Road

Maryland Heights, MO 63043

Geoff,

My apologies for this just getting to you, Our bubble is performing above and beyond our expectations. Compared to the structure we previously had, well there is no comparison really. So far we have used over 1000 gallons less in propane than at this time last year, and we've had slightly cooler temperatures. I have had nothing but positive comments from our swimming membership. We have gained new members also as a result. The structure has also made it easier to maintain our 150,000 gallon pool, from the chemical perspective. We are using less chlorine and with a constantly maintained temperature and proper ventilation we have not had to deal with any algae. The halide lights inside really make the area inviting and parents of the swim team now socialize inside, instead of waiting in their cars. All in all we are pleased with Arizon's product, I am also appreciative for your support as well as Tim Welker's and Mike Roche's. I feel like I can give anyone of you a call if I have a problem.

Sincerely,

William Lillard
